**Algiers, 24-25 June 2023**

The Laboratory Animal Sciences (LAS) African conference aims to take advantage of international and regional expertise to be a continuation of extensive knowledge sharing, networking and education on the best international practices in the laboratory animal science in Africa and build a sustainable forum exchange on the various topics related to Ethics of Scientific Research with Animals.

The Laboratory of Research in Arid Zones in partnership with the Algerian Association of Experimental Animal Sciences (AASEA) will organize African Conference in June 2023 in order to establish the education and training needs in the field of laboratory animal science in Africa and to develop targeted solutions to address these needs. A common education and training framework will be sought to assure the competence of persons involved in the care and use of animals for scientific purposes and to facilitate meeting the requirements of applicable regulatory and national standards.

The **conferences** will be given to the supervision, competence assessment and continuing education of persons who take care or perform scientific procedures on animals, those who design procedures and projects, laboratory animal technologists and laboratory animal veterinarians, facility managers and members of institutional animal ethics committees.

**"Ethics of Scientific Research  
with Animals"**

Conference invitees will include representatives from African institutions and main international stakeholder organizations that use or govern the use of animals for scientific purposes, including the World organization of animal health (OIE), University of Leeds (UK) and International Council of Laboratory Animal Science (ICLAS).
